Surviving inflation and the supply chain crisis

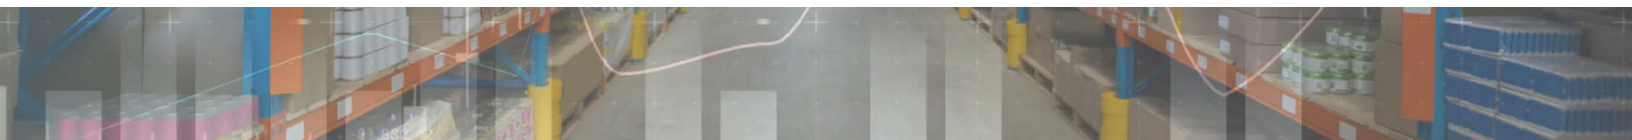

Strategy No.2: Transforming you own data into a powerful growth engine

This second of four strategies we're presenting at the 2022 VIPAR Heavy Duty Annual Business Conference is driven by The AutoPowerBI (Data Analytics) Service.

The AutoPowerBI Service does more than give you the ability to weather current market conditions...

It enhances your competitive power and agility for the long haul — and in ways you probably never imagined.

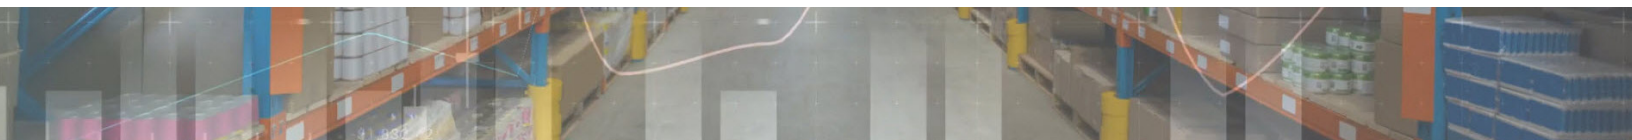

It's a business analytics, data extraction, authoring, and publishing solution that allows AutoPower business owners, managers, and users to visualize data and share insights across the organization.

It brings to life the vast detail of data in the AutoPower System with live interactive dashboards and reports. Reports analyze specific business operational areas ranging from sales analysis and financial analysis, to inventory analysis and shop services and more.

With near-real-time visibility and control across your business operations, you can now:

- Monitor, measure and improve the performance of individual sales personnel, manufacturers and product lines.
- Better anticipate and fulfill customer needs.
- Improve inventory management.
- Detect competitor encroachment.
- Make better, more informed business decisions.
- Improve overall operational efficiency and financial management.

Want to see AutoPowerBI in action?
Watch our demo of the Customer Deep Dive Report!

We look forward to meeting you at the VIPAR conference and will show you the advantages that AutoPowerBI can bring to your organization, along with three other timely strategies to help you survive and thrive through these turbulent economic times.

In our next email, we'll outline a strategy on how to streamline your accounting processes, for both you and your customers. In case you missed it, [click here](#) to read our last email that outlines the first strategic steps to empower your business with our Price Management Module.

Thank you and we hope to see you in Marco Island.
