Surviving inflation and the supply chain crisis

Strategy No.3: Turning your technology from a burden to a competitive advantage

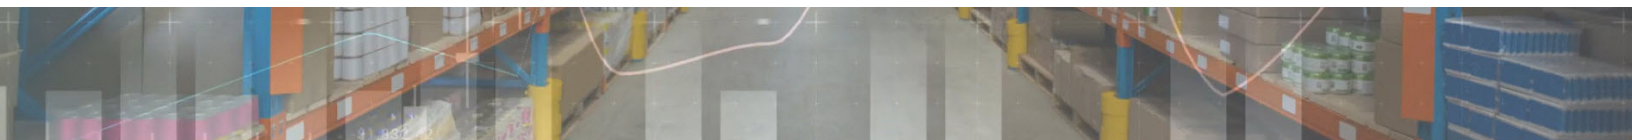

The forth strategy we're presenting at the 2022 VIPAR Heavy Duty Annual Business Conference is all about freeing you from the burden of maintaining your IT infrastructure so you can better focus your time and resources on running your business.

With AutoPower's Hosting Center Service...

**Our experts take on the management of your IT
infrastructure and your AutoPower System.**

Hosting Center services include managed firewalls, server updates, instant memory and processing power upgrades, data backup and recovery, remote access and 24/7/365 monitoring.

With the latest technologies available, we target 99.99% uptime plus rapid data recovery with numerous system recovery points.

Our technology represents our commitment to provide your business with the most reliable data protection and fastest disaster recovery technologies available.

Making the move to our Data Center will empower you to enhance your business operations in multiple ways:

- Lower IT costs
- Increase uptime
- Rapidly recover from disaster
- Lower cost of ownership
- Scale operations as needed
- More effectively leverage IT to drive business growth
- Protect against the growing threat of ransomware attacks
